Rai University Ahmedabad

INTRODUCTION

We all know how much the crime rate has increased these days. We often read in newspapers and TV about crimes like Rape, Murder, Hit and Run case etc. But we have rarely heard of those criminals getting punished.

After all, why does a criminal don't get punishment or does it get delayed?

After all, why does no criminal ever apologize for their actions?

Don't they regret their actions? Are they not afraid of the law or justice?

If not, then what is the power behind that save the criminals?

Is this Dark Politics??

Politics was created for the people of the country so that they can make the country and its people better. But people associated with politics are always busy in making themselves better and filling their pockets.

I am so sorry to say that there are very few or no political teams that think anything about their country or the people. Their obsession to Money and Power has trapped them in a deep swap and that swap is the swap of Corruption. Doing illegal things for money and position using one's position and money to hide them and this process is called "**Underworld Politics: The Dark Side of Power and Criminalization**".

Yes Dark Politics and Criminalization is the main reason in today's world of continuously increasing Crime Rate. If the crime rate continues to increase like this, it will become a big problem for us.

As we can see, crimes are increasing day by day in our country. Is it happening only in our country? The answer is no because crimes are increasing in every country in the world but the matter of concern is that we do not get justice there, our story is only about those people, as if we have taken the example of European countries, we do not get justice quickly or there, the government is also not helping in taking our country forward. It has happened but its opposite has been seen here, justice has been delayed here. Terrorism is also mixed in underworld politics. For example, some time ago a movement was started in our country which is still going on, the "Kisan Andolan", Kisan Andolan was started for the rules to be imposed on the farmers but gradually it became a political issue even today. It's only being used to defeat the opposition political party or to bring down for opposition not for the farmers. The real query is never solved till today. Many reports tell that in Kisan Andolan participate most of the people are not farmers they are paid people.

In that movement, to fulfill its demands, everything was done except talking to the government, such as hoisting the Indian flag, throwing stones at the police or the army and raising slogans in support of Pakistan. It has been done but it remains a mystery till today that why did they harm their country to fulfill their demand? Were they really doing this for their rights? If yes then this is the most illegal way to get rights.

It has come to light from the reports that the farmer's movement is being funded by foreign country so that our economic condition is affected, hence we can call it Dark Trick of Underworld in which big political party and powerful countries are subverting each other. They rise rumours because of this public anger are increased and then starting of downfall of country. Best example of this is Bangladesh.

As we can see our neighboring countries, due to the increase in underworld politics, what is their condition now, like Pakistan, there is mostly loot, flour, vegetables, milk and fruits are all expensive from everywhere. People commit crimes like murder to earn food and run their household but the government is still busy filling its pockets. This shows to us Dark Side of Power, Power is a very important factor to stay in Politics. People give more importance to power and pad than experience or this is the mistake of all of us in the office, we always give more respect to the boss who is older than us or calls us by their name. So it's fault of our mindset. Listen by our position or power we never create respect in people's heart by our behaviour and our work we made our name, impression and respect.

BODY PARAGRAPH

As we can see that the crime rate is increasing but on the contrary the justice rate is decreasing. But practically, who does this crime? Do people have the guts to do all this? I don't think that an ordinary person will think twice

before doing all this because he knows that he has responsibilities towards his own , family and society. That if he does something wrong or commits a crime than no were save him or help him. And also he will loose all his image , money and respect in five seconds .

But no one can do anything to those people who are surrounded by politics because law and justice are in their hands.

Let us look at some cases :

Case 1 - Start with a famous Hit and Run case , A Porche car driven by a minor , hit two IT worker in Pune . But because of his family have high connection he was asked to write 300 words of eassy as an apology instead punishment or Juvenile Detention Center.

Case 2 – Rape , rape is no less than a nightmare for every girls. In 2012 well known case of Delhi Gang Rape and Murder “Nirbhaya Case” in which a 22 – year – old girl was beaten , gang – raped and tortured in a private bus by six man and sadly after waiting seven – year she got justice but wait , wait , wait

At the what cost

- People questioning her(even she’s dead) why she hang out in late night with her male friend.
- Blaming for her attire.
- Questioning about her that why she was no shouted , judging the way she was walking etc.

Justice you really need to stop being pitiless , death – warrant after 7 years is not any type of justice.

Case 3 – Now we can take another hearth trembling case of Udaipur murder case in which a tailor who named Kanhaiya lal was mercilessly murdered by Mohammed Javed . Reason was victim post in support of Indian politician Nupur Sharma.

And after that what happened he got justice?

No “Rajasthan High Court granted bail to one of the accused , Mohammad Javed” reported by Live Law.

Case 4 – Even today in India, the practice of dowry is prevalent in the society. In many places it is called respect, in many places it is a responsibility for a poor father, and in some places it is a reason for a girl to burn in flames. It is very popular in states like Bihar, Rajasthan and Uttar Pradesh.

In Rajasthan a 34 – year – old Mukesh stabbed his wife to death with a knife for dowry . So we can say now how much people are hungry for money .

How We Can Control Underpolitics

- **Corruption** – Corruption is a main reason behind the most of the crime . As we know , a corrupt country can never progress and Indian one of the great scientist Abdul Kalam said one thing to a school girl that “ When you will grow up than promise yourself that you try to vanished Corruption from our Country .

So now we can understand corruption is a root of Underworld Politics.

- **Spreading Awareness** – By spreading awareness about Underpolitics , their dirty tricks we can control it.

Many politician party offers mobile , money , free drinks etc directly it is a Gratification to win election but we need to aware they try to buy our right through offer this types things.

In future there are high possibility that they ignore our queries , problem and our nation.

- **By Understand and Realise What is Right and Wrong** - People always get trapped in the sweet and false words or promises of these politicians but we should know what is right and what is wrong. At last it’s all on us , we should think what is right and wrong.

- **Strengthen Law** – As we know that law is the biggest, but what if our law is weak, our law is weak , our law is money grubbing and bribery.

Yes we thought right then there will ruin ourself , ruin of the country, ruin of law , ruin of the economy because if the people who provide justice remove the blindfold and give injustice then all this is certain to happen.

Therefore we have to strengthen our law , if law and justice are strong then there is no power , the can saw crime.

- **Engage Media** – Media is a very big or useful thing, it does not just give us news, with news it can give us a lot of joy, happiness, awareness. One thing is very good that the media of our country is free and can speak freely. If our media is not sold or if the illegal case is opened in front of everyone then this is a very good thing, of course it will affect the things like Criminalization on Underworld Politics.

- **Promote Trustworthy Leadership** – A good leader of any group or country is not the leader who just talks good words but the leader who shows the courage to say things and who always thinks about taking his country forward. A good leader should always think about his country and countrymen.

He should come up with new ideas so that he can do good to everyone. And yes if we have power to choose a good leader then why we don’t use cleverly and now it’s our responsibility to choose a trustworthy leader for our country .

CONCLUSION

“Underworld Politics : The Dark Side of Power and Criminalization” directly indicate misuse of their power. Very few among us known about their Dark Reality. Let’s take an example a son of famous businessman who driven a car in drunk state and hit an Audi in 2013. But at last what happened? They got justice? Nooo , not a justice but they got money settlement but can money buy value of a life ?

And after that that businessman buy all media houses for remove his son’s News’s and guess what after some days new of this incident are vanished. So now we can say money , power and position is how much effective. People thinks money can buy a life or value of life how much is poor thinking.

After getting rid of the British rule, Mafia rule prevailed in most of Mumbai and it took us how many years to get rid of the Mafia rule or underworld. It was not so easy to survive in Mumbai during that time . From minister to an ordinary person all are work and need to listen mafia and that is compulsory rule. Even during that period, Mafia rule was ruling, many people risked their lives and many people were forced to get involved in illegal activities like drugs even if they did not want to. But do you think that in today’s time the mafia rule has ended ? Is this true ? If you also feel the same then you are wrong because today more illegal work is being done than ever before, more drugs are being used than ever before , more theft is being done than even before, more murders are being planned and done even before but that is the only difference that all this is now done secretly and all these things include big politicians, businessman , mafia and ministers . All of them do illegal work while staying away from people’s sight or that is why we have named it “Underworld”.

We need to understand we will take ourselves and our country forward only when we are aware. We should promise ourselves that we will never associate with anything wrong because the justice system was blind today and will remain blind in future too.

Now it is up to us to make the future generation corrupt or one that demands justice or one that gives justice.
